Backing up a firebird database procedure:

1. Working from a DOS prompt in the directory where the GFIX and GBAK utilities are located. (C:Program FilesFirebirdFirebird2_1in)
2. Define the two variables. They are entered at the DOS prompt:
3. Command: SET ISC_USER=SYSDBA
4. Command: SET ISC_PASSWORD=masterkey (or user defined password)
5. Do a backup of the database
    1. Command: gbak -b -g -v -z <database_name>.gdb <database_name>.gbk
