VPN is only supported with *biometric clock models and any MTX30.

Except for HP models, it's recommended to set net speed to lowest or 10M.

VPN between client workstations and server is not supported.

VPN is allowed when accessing the web module.

DMZ or port forwarding connections to the clock are only supported with *biometric clock models and any MTX30. However, this must be configured by your IT personnel. Amano is not responsible for this setup.

*biometric = HP, FPT, MTX30
