Introduction

How to replicate a standard custom configuration to multiple TS-3000i(s)

Answer:
The following steps will allow you to generate a standard custom configuration setup from your initial clock and copy the settings via a file upload to any subsequent TS-3000i terminals.

To your original current TS-3000i clock, simply do the following:

1. Login to the clock's webpage
2. Utilities – backup/restore
3. Backup – configuration
4. shared
5. Run backup

Note: The backup will be generated in your ftp location which was specified in your utilities – settings section.

1. Login to the 2nd TS-3000i clock webpage
2. Setup the ftp settings same as the 1st TS-3000i clock
3. Select the Utilities – backup/restore
4. Select the Restore tab
5. shared
6. Click Restore

Note: This will use the ATVSConfig.bin file created from your 1st clock and restore the config settings only.

Conclusion

Thank you for your time, and have a great day. As always, feel free to submit ideas on topics you want addressed in the Amano Knowledge Base using the comments feature.
