- Tremendous speed improvement to QuickBooks integration and better error logging, from the old 30 minutes to few seconds of payroll run
- Support for 30 bell lines from 16 limit for MTX30 models
- Easy access to 800 support line
- Added Heartland payroll support
- Updated communication icons with text labels
- Removed false positive detection with most antiviruses
- Support for alphanumeric serial on wifi MTX30

Fixes on x.7:

- No OT split support for custom paycodes
- Match negative entries on apache/web with existing java client functionality
- Improved 3rd/night shift calculation when transitioning to new period
- Support for Historical report in other timezones than EST
- Disable bell ring on swipe with MTX30
- Prevent crash when wrong model clock is used/entered

Conclusion

Thank you for your time, and have a great day. As always, feel free to submit ideas on topics you want addressed in the Amano Knowledge Base using the comments feature.
