

TruTime Daylight Saving Change Instructions

1. In order to change the Time on the Terminals you must go into the Communications Tab of TruTime.

2. Then go into the Polling downloading screen for your Terminal Type I.E. – Handpunch or MTX10/20.

For Handpunch Terminals

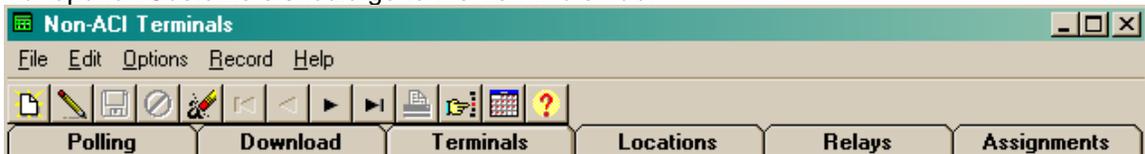

For MTX 10/20

MTX customers then should go to the Terminal Setup Tab.

Handpunch Customers should go to the Terminals Tab.

3. Once in these Tabs you need to select the Terminals. It is advisable for customers with multiple Terminals that are not directly connected to their PC, such as Ethernet or Modem. You should update these units one at a time, not all at once.
4. When you click on the button, you will be presented with a screen that shows you the current time and remote time (Remote time is to show you the Time the terminal will be at once you download, NOT the current time. It is for customers with clocks in different time zones. There are two calendars in the download screen one for the beginning of DST and one for the end. You MUST set the Year, Month, and Day properly. Then Click the box for DST if it is not enabled and click Download or OK to send the Time to the Clock.

This is the Download Screen for Handpunch Terminals.
